

U.S. 2001 Carbon Emissions from Energy Consumption — 1547* MtC

Source: Energy Information Administration, *Emissions of Greenhouse Gases in the United States 2001*

*Includes adjustments of 14.8 million metric tons of carbon (MtC) from U.S. territories, less 26.4 MtC from bunker fuels

Note: Numbers may not equal sum of components because of independent rounding

Lawrence Livermore National Laboratory, July 2003
